

What is claimed is:

1. A device comprising:
  - a display unit;
  - 5 a first means for displaying on said display unit a first screen for changing a display language; and
  - a second means for displaying on said display unit a second screen having an optional item for displaying a language change screen, said optional item being displayed
  - 10 in a predetermined language.
2. A device according to claim 1, in which said predetermined language is English.
3. A device comprising:
  - a display unit;
  - 15 a first means for displaying on said display unit a language change screen for changing a display language;
  - a second means for displaying on said display unit a plurality of setting screens for setting said device; and
  - a switching means for switching from a setting screen
  - 20 displayed arbitrarily by said second means to the language change screen.
4. A device according to claim 3, in which said switching means is provided on each setting screen.
5. A device according to claim 4, in which said

switching means includes an indication described by means of a specified language.

6. A device according to claim 4, in which said switching means includes an indication composed of a predetermined symbol.

7. A device according to claim 3, in which said switching means is provided outside of said display unit.

8. A device according to claim 7, in which said switching means includes an indication described by means of a specified language.

9. A device according to claim 7 in which said switching means includes an indication composed of a predetermined symbol.

10. A device comprising:  
a display unit;  
a first means for displaying on said display unit a first screen for changing a display language;  
a second means for displaying on said display unit a second screen having an optional item for displaying a language change screen;

a third means for displaying on said display unit a plurality of setting screens for setting said device; and

a switching means for switching from a setting screen displayed arbitrarily by said third means to the second

screen.

11. A device according to claim 10, in which said switching means includes an indication composed of a predetermined symbol.

5 12. A device according to claim 11, in which said predetermined symbol is a return symbol.

13. A display device comprising:

10 a display means for displaying a first screen for setting a display language and a second screen having an input area for displaying the first screen; and

a control means for displaying a description in a predetermined language in said input area regardless of a language currently set up.

14. A method of display comprising the steps of:

15 (A) displaying a language change screen for changing a display language;

(B) selecting one language as a display language from a plurality of languages using the language change screen; and

20 (C) displaying a screen in a selected language while displaying in an input area intended for displaying a first screen in a predetermined language regardless of the selected language.
